

My name is Samantha and I am 37 years old. I have stage IV Endometriosis and Uterine Fibroids. After trying, unsuccessfully, on our own and trying IVF, unsuccessfully, (without Acupuncture) I was to say the least distraught. Dr's told me I "have bad quality eggs" and if I got pregnant "the chances of carrying to full term or possibly having a baby with Downs was high". With research I found many infertility couples got pregnant with Acupuncture.

Thankfully I found Dr. Wei who was able to help. My FSH levels were high at 12. With a change in Acupuncture treatment, Dr. Wei got my FSH down to 8, which my Reproductive Endocrinologist was happy with to begin IVF. After 3 previous failed IVF's and a 1 cancelled IVF due to high FSH, I had an easy IVF cycle with Dr. Wei's treatment. My egg quality was GREAT. The day of transfer I was so nervous, my RE said we had 4 good quality embryo's. I cried. I wasn't pregnant yet, and couldn't believe with Acupuncture I had GOOD QUALITY embryo's. We transferred all 4 due to my age. I am happy to say I gave birth in January to twins, 1 boy 1 girl, the best of both worlds.

Now, I tell everyone I know who has been trying unsuccessfully to try Acupuncture. It not only helped my body get pregnant, but it also reduced my stress.

My husband and I can't thank Dr. Wei enough. Without her I wouldn't have gotten pregnant.
