Dr H. Wei,

I have had a right shoulder problem for over 2 years If not longer. I have been treated with deep tissue message, physical therapy exercises and stretches, I have seen various chiropractors, and have recently seen an Orthopedic who has diagnosed me as having bursitis under my right scapula. He has ordered an MRI to determine if there could be another cause for my pain. I am an avid golfer and have not been able to play pain free for the past year. I get the shoulder treated and the problem always comes back. And I begin the cycle all over again. Can you help me? I saw your advertisement in the "Winston Trails neighborhood news."

Dr. H Wei,

You are fantastic! You treated me yesterday morning and I was able to sleep last night PAIN FREE!! This is the first time I have been able to do this in many months. I feel so rested this morning and am amazed at your talent and skill. I know I have a ways to go until I am completely healed of this injury that has plagued me for many years.

Thank you very very much,

Patient John
